

ATEQ Engineered Products

Background to

ATEC EQUIPMENT

Introduction

ATEC Equipment (Pty) Ltd was established in 2011 to provide an innovative and flexible alternative to the existing major equipment suppliers, market and industry.

We are an innovative process solutions company, that specialize in supplying equipment and systems that meet our clients' particular needs, or develop customized solutions.

We are based in South Africa, but source globally to provide the best solutions to our clients throughout Africa.

We have already installed equipment under the **ATEQ** brand in Southern, Central and West Africa, and are looking to build long term relationships across the continent.

Company Approach

ATEC Equipment (Pty) Ltd ensures quality from design through fabrication and supply, by following a stringent Quality Management System that governs all aspects of Quality Assurance and Quality Control.

We have established relationships with foundries, structural/platework fabricators and a variety of workshops for specialized fabrication and assembly.

We use global logistics companies to ensure deliveries to remote locations and can provide experienced crews to assist clients with installation and commissioning.

We also have access to full Engineering, Project Management and other project services.

Overview of

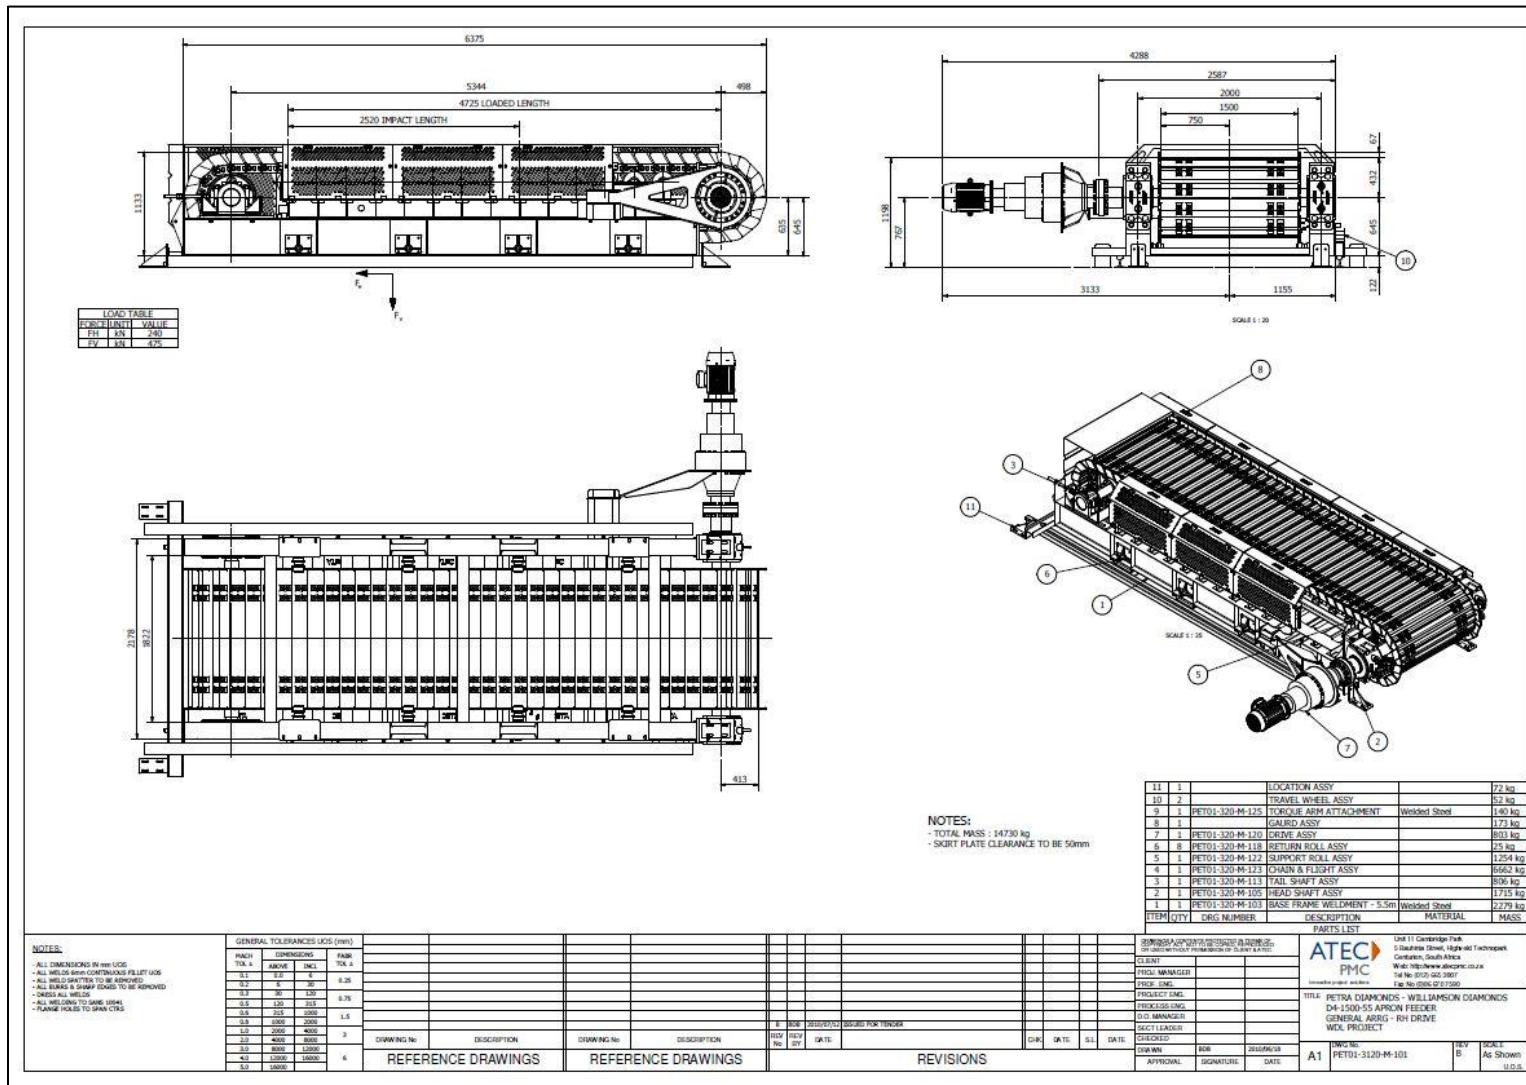

ATEQ ENGINEERED PRODUCTS

Product List

The products below are examples of equipment that we have developed to fulfil a particular need, but you are welcome to contact us for any other process requirements:

- Apron Feeders
- Belt Feeders
- Vibrating Grizzly Feeders
- Vibrating Pan Feeders
- Stacking Conveyors
- Tripper Conveyors
- Extraction Systems
- Bucket Elevators
- Air Slides
- Screw Feeders
- Scrubbers
- Mill Liner Handlers
- Mill Ball Chargers
- Ladle Tilters, etc.

Apron Feeder Design

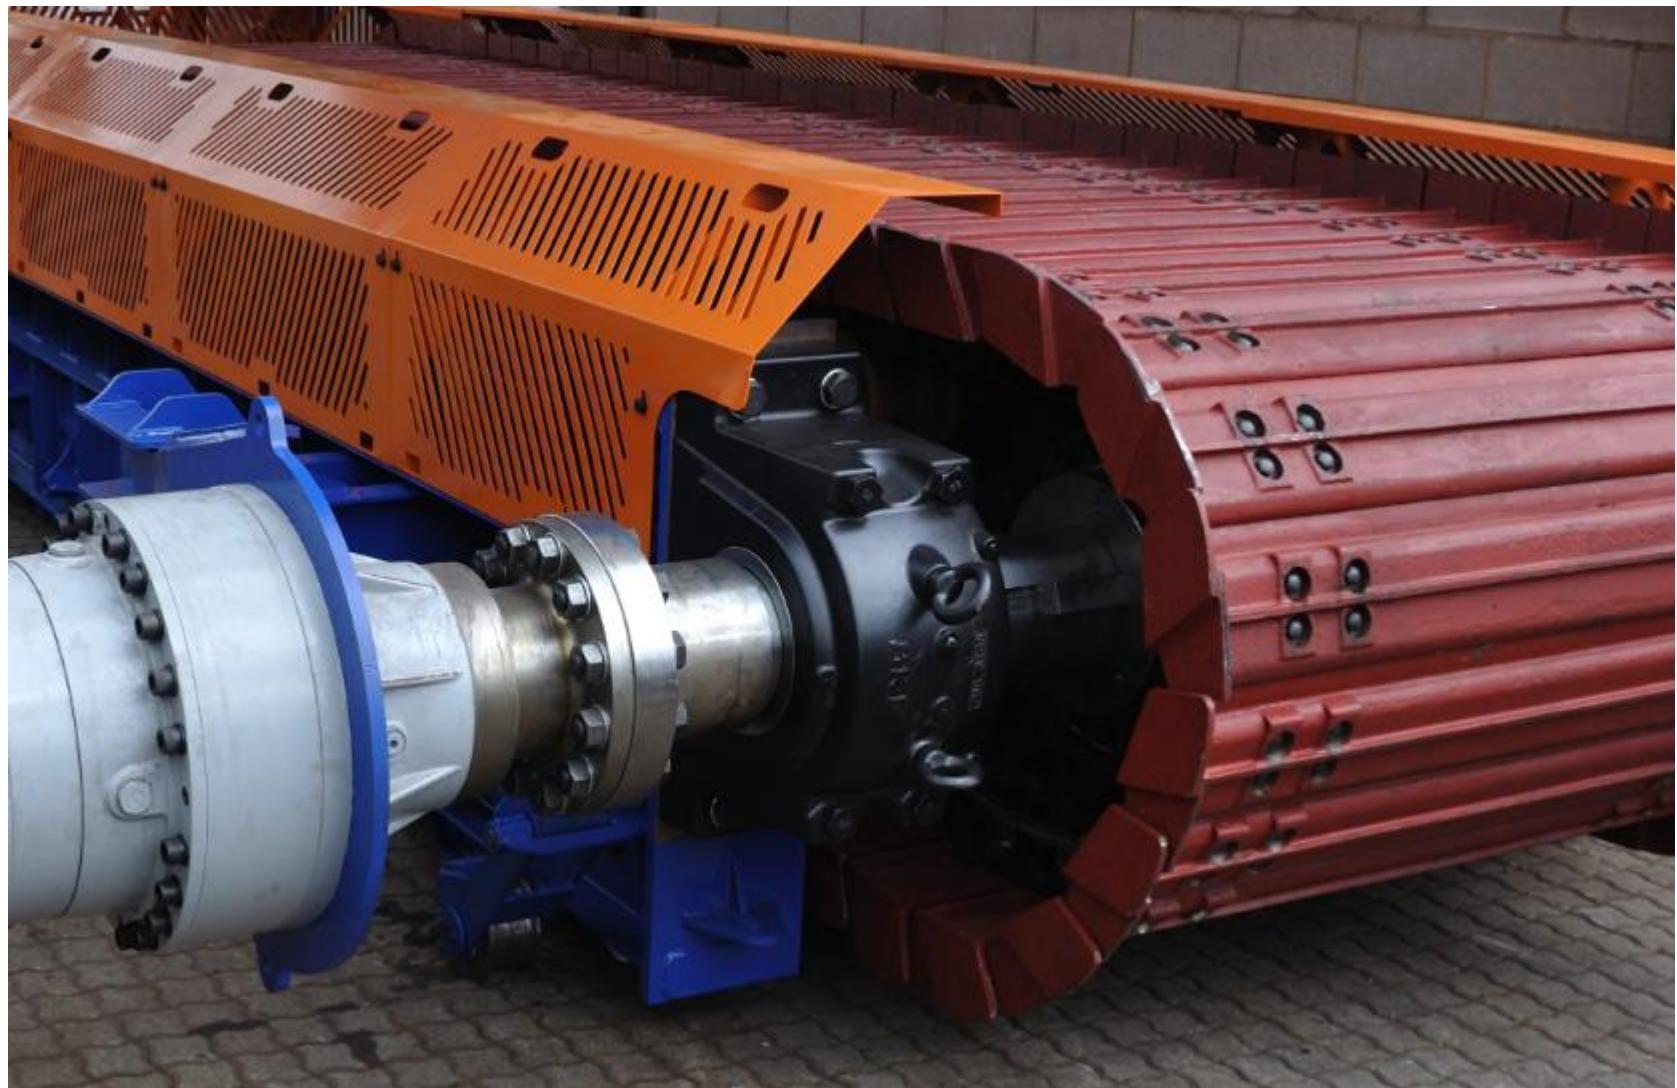

Apron Feeder - Features

- Minimized operational height for ease of installation
- Enhanced safety aspects with integrated drive and track guards
- Reduced overall weight for benefits during transport and installation
- Flexible straight or right angle drive arrangements
- Simple and reliable hydraulic or electro-mechanical track drive systems
- Optional variable speed control through inverter drives
- Standard bearing elements designed for 100 000 hour duty
- Spherical bearings on main shafts eliminating misalignment
- Optimized track flights minimizing spillage of fines and build-up
- Impact bars to protect flights under extreme loading conditions
- Sealed bearings on track idlers improve reliability in arduous conditions
- Standard earth moving equipment chain, sprocket and wear components

In conclusion

ATEQ ADVANTAGE

Working throughout Africa

ATEC Equipment is based in South Africa, but source equipment and parts globally to provide the best solutions to our clients throughout Africa.

We have already installed equipment in Southern, Central and West Africa, and are looking to build long term relationships across the continent.

Conclusion

ATEC Equipment provides innovative process systems to clients in the mining, minerals processing and industrial environments.

We have established a range of specialized equipment to meet the needs of clients in these industries, ranging from materials handling systems to specialized equipment applications.

ATEC Equipment's advantage lies in working closely with clients to provide equipment or systems that meet their particular needs, develop customized solutions or assist with implementation.
